

Manufacturing Technician

Full-time · On-site in Oklahoma City, Oklahoma

About Us

We're a small, family-owned company that builds and installs cloud-based SCADA and IoT monitoring solutions for water and wastewater systems. We operate like a real family — close-knit, supportive, and invested in our people. Every contribution here matters.

The Role

We have an exciting opportunity for a Manufacturing Technician in our electronics manufacturing department. This is a hands-on role assembling the electronic devices at the heart of our IoT monitoring products. The ideal candidate has excellent eye/hand coordination and brings precision and attention to detail to every build — but experience isn't everything here. If you are a hard worker and a fast learner, we can teach you the rest.

What You'll Do

- Assemble electronic components and devices with precision and care
- Perform soldering and surface mount assembly work
- Follow assembly documentation and build instructions accurately
- Perform quality control checks to make sure every unit meets our standards
- Test completed assemblies and flag anything that doesn't look or perform right
- Keep your workstation organized and help maintain a clean, efficient production area

What We're Looking For

- Excellent eye/hand coordination with strong precision and attention to detail
- A hard worker and fast learner who takes pride in quality work
- Willingness to learn new skills and grow in a dynamic manufacturing environment
- Reliability and a team-oriented attitude

Nice to Have

- Experience with soldering and surface mount assembly
- Experience with quality control in an electronics or manufacturing setting
- Familiarity with electronic components and reading assembly drawings
